DEFENSE PLANNING AND PROGRAMMING CATEGORY (DPPC) DEFINITIONS

A. STRATEGIC. The DPPCs in the Strategic category consist of those nuclear offensive, defensive, and control and surveillance forces that have as their fundamental objective deterrence of and defense against nuclear attack upon the United States, our military forces and bases overseas, and our allies.

AA. Offensive Strategic Forces. This category contains program elements for land-based ICBMs, sea-based SLBMs, ballistic missile submarines and supporting ships, long-range bombers and refueling tanker aircraft, strategic cruise missiles, and operational headquarters for these forces. These program elements contain resources specifically identified and measurable to offensive weapon and support systems, including crews, organizational and field maintenance, weapon system security, operational systems development, and procurement of equipment for these forces. This category also includes research and development program elements for weapon systems programmed for procurement during the five year Defense Program projection. Program elements for corresponding or supporting Reserve Component units are also included in this category.

Excluded are program elements for tactical nuclear weapons delivery systems, strategic surveillance and reconnaissance, command control and communications systems, depot maintenance, and management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit and combat crew training.

AB. Defensive Strategic Forces. This category contains program elements for interceptor aircraft and anti-ballistic missile systems, including directly supporting communications, command, control, and surveillance and warning systems. These program elements contain resources specifically identified and measurable to defensive systems, including crews, organizational and field maintenance, weapon system security, operational systems development, and procurement of equipment for these forces. This category also includes research and development program elements for weapon systems programmed for procurement during the Defense Program projection. Program elements for corresponding or support Reserve Component units are also included in this category.

Excluded are program elements for those warning, surveillance, command control and communications systems that primarily support the World Wide Military Command and Control System (WWMCCS), depot maintenance, and management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit and combat crew training.

AC. Strategic Control and Surveillance. This category contains program elements for the World Wide Military Command and Control System (WWMCCS), airborne satellite and ballistic missile early warning and control systems, satellite and orbiting objects surveil-

lance systems, and supporting radar and optical sensor systems. These program elements contain resources specifically identified and measurable to strategic control and surveillance systems, including crews, organizational and field maintenance, weapon system security, operational systems development, and procurement of equipment for these forces. This category also includes research and development program elements for strategic control and surveillance systems programmed for procurement during the Defense Program projection.

Excluded are program elements for intelligence data handling; long-haul communications; surveillance, control, and communications systems in direct and immediate support of offensive or defensive forces; depot maintenance; and management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit training.

B. TACTICAL/MOBILITY. The DPPCs in the Tactical/Mobility category consist of land forces (Army and Marine Corps), tactical air forces (Air Force, Navy, and Marine Corps), naval forces (Navy), and mobility forces (Army, Air Force, and Navy). Special operations forces are imbedded in this DPPC.

BA. Land Forces. This group consists of DPPCs for Army and Marine Corps comprising division forces and theater forces.

BAA. Division Forces. This category contains program elements for Army and Marine Corps divisions, nondivisional combat brigades/regiments, other nondivisional combat forces, and tactical support forces; and for Marine Corps combat and combat support units (including helicopter support units of the Marine Air Wings). Program elements for the procurement and stockpiling of Army and Marine war reserve materiel, and for Army resources for the Joint Tactical Communications Program (TRITAC), are also included in this category. These program elements contain resources specifically identified and measurable to these units including maneuver battalions, organizational, direct support, general support and field (intermediate) maintenance, organic administrative and service activities, and procurement of equipment for these forces. This category also includes operational systems development program elements and other research and development program elements for weapon systems programmed for procurement during the Defense Program projection.

Excluded are program elements for support of theater (in contrast to division) forces and for management headquarters. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit training.

BAB. Theater Forces. This category contains Army program elements for theater-wide and specialized units, including separate infantry brigades stationed in Berlin and Panama; units in Europe that provide for supply, maintenance, and security control of nuclear ammunition support of NATO; theater surface-to-surface missile units; tactical surface-to-air missile units; theater heavy engineering battalions for support of other Services; theater psychological

operations, civil affairs, and unconventional warfare units (special operations forces and their supporting supply, maintenance, and command and control units. Also included are similar reinforcing units in Army Forces Command. These program elements contain resources specifically identified and measurable to these units, including maneuver battalions, organizational, direct support, general support and field (intermediate) maintenance, organic administrative and service activities, and procurement of equipment for these forces. This category also includes operational systems development program elements and other research and development program elements for weapon systems programmed for procurement during the Defense Program projection.

Excluded are program elements for management headquarters. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit training.

BB. Tactical Air Forces. This category contains program elements for Air Force, Navy, and Marine fighter, attack, and reconnaissance squadrons; direct support aircraft, armament and electronics maintenance units, and weapon system security units; multipurpose aircraft carriers; air-launched tactical missile systems and ground launched cruise missiles; tactical air control systems; Fleet Marine Force direct support aircraft; operational headquarters for these forces and special operations forces. Also included are program elements for Air Force command control facilities and systems in Europe and the Pacific, Air force resources for the Joint Tactical Communications Program (TRITAC), and war reserve materiel. Program elements for corresponding or supporting reserve component units are also included in this category. These program elements contain resources specifically identified and measurable to tactical air forces weapon and support systems, including crews, organizational and field maintenance, weapon system security, operational systems development, and procurement of equipment for these forces. This category also includes research and development program elements for weapon systems programmed for procurement during the Defense Program projection.

Excluded are program elements for airlift squadrons (Mobility Forces), depot maintenance, and management headquarters. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit and combat crew training.

BC. Naval Forces. The DPPCs in the Naval Forces group include the Navy's warfare (ASW) and fleet air defense forces, amphibious forces, and supporting forces.

BCC. Warships and Antisubmarine Warfare (ASW) Forces. This category contains program elements for surface combatant ships (cruisers, battleships, destroyers, and frigates), fixed wing and helicopter ASW squadrons, attack submarines, mines and mine countermeasures, and tactical supporting forces. Also included are program elements for air launched, sea launched, and submarine launched ordnance and missiles. Program elements for corresponding and supporting reserve

component units are also included in this category. These program elements contain resources specifically identified and measurable to ASW and fleet air defense forces, including crews, maintenance, and procurement of equipment. This category also includes operational systems development program elements and other research and development program elements for weapon systems programmed for procurement during the Defense Program projection.

Excluded are program elements for fleet ballistic missile submarines, sea launched ballistic missiles, tactical air forces, carrier flight manpower, and management headquarters. Also excluded are support activities consisting of base operations, real property maintenance, base communications and unit training.

BCD. Amphibious Forces. This category contains program elements for amphibious assault ships supporting ships and tactical support units, coastal/river forces, Navy special warfare forces, explosive ordnance disposal forces, and inshore undersea warfare forces. These program elements contain resources specifically identified and measurable to these forces, including crews, naval beach groups, tactical air control groups, harbor clearance units, maintenance, and procurement of equipment for these forces. This category also includes operational systems development program elements and other research and development program elements for weapons systems programmed for procurement during the Defense Program projection. Program elements for corresponding or supporting reserve component units are also included in this category.

Excluded are program elements for minor fleet support ships, the Naval Ordnance Disposal Facility, depot maintenance, and management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit training.

BCE. Naval Support Forces. This category contains program elements for forward logistical support forces, carrier-on-board delivery squadrons, intermediate maintenance activities, fleet support ships, underway replenishment ships, construction forces, deep submergence systems, and fleet telecommunications. Also included are program elements for tactical intelligence, war reserve materiel, and the Navy component of the Joint Tactical Communications Program (TRITAC) program. These program elements contain resources specifically identified and measurable to support forces. This category also includes operational systems development program elements and other research and development program elements for support force systems programmed for procurement during the Defense Program projection. Program elements for corresponding or supporting reserve component units are included in this category.

Excluded are management headquarters and support activities consisting of base operations, real property maintenance, base communications, and unit training.

BD. Mobility Forces. This category contains program elements for strategic, tactical, and administrative airlift; sealift, and land movement of passengers and cargo by both military and commercial carriers, including military cargo, tanker, and support ships; and the Defense Freight Railway Interchange Fleet. This category also contains program elements for tactical medical airlift squadrons, air and sea port terminal operations, traffic management, integral command and control systems, aerospace rescue and recovery, and Air Force special mission forces. Program elements for corresponding or supporting reserve component units are also included in this category. These program elements contain resources specifically identified and measurable to these activities and supporting systems, including crews, organizational and field maintenance, weapon system security, and procurement of equipment. This category also includes operational systems development program elements and other research and development program elements for mobility forces programmed for procurement during the Defense Program projection.

Excluded are program elements for management headquarters. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and unit and combat crew training.

H. COMMUNICATIONS AND INTELLIGENCE. This category contains program elements for the centrally managed communications and intelligence gathering activities.

HA. Centrally Managed Communications. This category contains program elements for the long-haul Defense Communications Systems, the military Service's communications systems, satellite communications systems, communications security, communications engineering and installation activities, and the Electromagnetic Compatibility Analysis Center. Program elements for corresponding or support reserve component units are also included in this category. These program elements contain resources specifically identified and measurable to these communications systems and activities, including research and development and procurement of equipment.

Excluded are program elements for base and command communications, intelligence communications, and communications systems dedicated to strategic, tactical or WWMCCS missions, and management headquarters.

HB. Intelligence. This category contains program elements for the centralized intelligence gathering and analytic agencies and activities of the Department of Defense, consisting of the Consolidated Cryptologic Program and the General Defense Intelligence Program, including intelligence communications. Program elements for corresponding or supporting reserve component units are also included in this category. These program elements contain resources specifically identified and measurable to these intelligence programs, including research and development and procurement of equipment.

Excluded are program elements for intelligence activities that are organic to strategic and tactical forces, for general intelligence and cryptologic training, and for management headquarters.

J. COMBAT INSTALLATIONS. This category contains program elements for the operations and maintenance of installations of the strategic, tactical, airlift and sealift commands (Programs 1, 2, and 4), including supporting real property maintenance, base communications, installation audiovisual support, and air traffic control. Also included are resources for installation headquarters administration and installation operational, housekeeping, and service functions. Program elements for corresponding or supporting reserve component units are also included in this category.

Excluded are program elements for management headquarters, family housing, commissaries and overseas dependents education.

K. FORCE SUPPORT TRAINING. This category contains program elements for Air Force and Naval advanced flight training conducted by combat commands; Navy training conducted at sea and ashore in direct support of submarine, surface combatant, surveillance, and mine warfare forces; fleet level training at fleet training centers, submarine schools and warfare schools; and certain Army and Marine Corps unit and force-related training activities. Included are resources for fleet readiness squadrons, and Air Force combat crew training squadrons. These program elements contain resources specifically identified and measurable to these units, including organizational and field maintenance, training equipment and munitions, and aerial targets. Program elements for corresponding reserve component units are also included in this category.

L. MEDICAL SUPPORT. This category contains program elements for medical care in DoD regional medical facilities, including medical centers and laboratories; station hospitals and medical clinics; and for medical care to qualified individuals in non-DoD facilities. This category also includes research and development program elements in support of medical research, medical equipment and systems, and health care in station hospitals and medical clinics. Program elements for corresponding or supporting reserve component units are also included in this category.

Excluded are program elements for mobile medical units organic to combat forces, and for management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, and base communications and medical training.

M. JOINT ACTIVITIES. This category contains program elements for those source manpower billets which are outside of service control. They included manning requirements of such organizations as the Joint Staff and Defense Agencies. Includes management and headquarters.

MA. International Military Organizations. This category contains the program elements for the military Services' support of the headquarters of international military organizations. Examples are:

NATO, United Nations Command (Korea), etc. Also included are corresponding reserve component program elements.

MB. Unified Commands. This category contains the program elements for the military Services' support of the headquarters and activities of the unified commands. Examples are: . European Command, . Pacific Command, etc. Also included are corresponding reserve component program elements.

MC. Federal Support Activities. This category contains program elements for military and civilian DoD personnel assigned on a reimbursable or basis to support other federal agencies.

Excluded are personnel providing support to foreign governments.

MD. Joint Staff. This category contains the program element codes for the staff of the Chairman, Joint Chiefs of Staff.

ME. OSD/Defense Agencies and Activities. This category contains the program element codes for the Staffs of the Secretary of Defense and Defense Agencies and Activities. These program elements contain resources specifically identified and measurable to these organizations.

N. CENTRAL LOGISTICS. This group includes DPPCs for centrally managed supply, procurement, maintenance, and logistics support activities.

NA. Supply Operations. This category contains program elements for the operation of supply depots and centers, inventory control points, and centralized procurement offices. It also includes resources for petroleum/oil/lubricant () pipeline and storage operations and other resources specifically identified and measurable to centralized supply operations and corresponding reserve component program elements.

Excluded are supply activities organic to combat forces, depot maintenance, logistics support activities, second destination transportation, industrial preparedness, management headquarters, base operations, and real property maintenance.

NB. Maintenance Operations. This category contains elements for the centralized repair, modification, and overhaul of end items of equipment and their components conducted at depots, arsenals, reprocessing facilities and logistic centers. These program elements contain resources specifically identified and measurable to the cited maintenance activities, including procurement of maintenance equipment. Also included are corresponding reserve component program elements.

Excluded are maintenance operations organic to operating units, field maintenance, logistic support activities, and support activities of base operations, management headquarters, and real property maintenance.

NC. Logistics Support Operations. This category contains program elements for centralized logistics activities, other than supply and maintenance. Specifically included are program elements for industrial preparedness, second destination transportation, property disposal, production engineering and testing, construction planning and design, operation of printing plants, storage and disposal of inactive equipment (including aircraft), logistics administrative support, and other centrally managed logistic support services. These program elements contain resources specifically identified and measurable to these central logistics support activities. Program elements for corresponding reserve component units are also include in this category.

Excluded are program elements for supply operations, maintenance operations, management headquarters, and the support activities of base operations and real property maintenance.

O. SERVICE MANAGEMENT HEADQUARTERS. This category contains the program elements for the service combat and support commands.

OA. Combat Commands. This category contains the program elements for the headquarters of the military Service combat commands, i.e., those in Major Defense Programs 1, 2, and 4. Examples are: . Army, Europe; . Navy, Pacific Fleet; Strategic Air Command; etc. Also included are corresponding reserve component program elements.

OB. Support Commands. This category contains the program elements for the headquarters of military Service support commands, i.e., those in Major Defense Programs 3, 6, 7, 8, and 9. Also included are corresponding reserve component program elements.

Q. RESEARCH AND DEVELOPMENT/GEOPHYSICAL ACTIVITIES. This category includes program elements for major defense wide activities conducted under centralized OSD control.

QA. Research and Development Activities. This category contains all research and development (Program 6) program elements, except those for weapon systems for which procurement is programmed during the Defense Program projection and for program elements identifiable to a Support Activity DPPC such as Medical or Personnel Support. Also excluded are operational systems development and other program elements not in Program 6, but containing research and development resources.

QB. Geophysical Activities. This category contains program elements for meteorological, topographic, oceanographic, and navigational activities, including the Defense Meteorological Satellite Program, the Air Force and Navy weather services, navigational satellites, oceanography, and mapping, charting and geodesy activities. Program elements for corresponding or supporting reserve component units are also include in this category. These program elements contain resources specifically identified and measurable to these

geophysical activities, including research and development and procurement of equipment.

R. TRAINING AND PERSONNEL.

RA. Personnel Support. This category contains the staff and faculty program elements for formal military and technical training and professional education of military personnel conducted under centralized control of Service training commands. Program elements include those for recruit training, officer acquisition training (including), general skill training, flight training, professional development education, health care individual training, and training support activities. This category also includes research and development program elements in support of new or improved training equipment, techniques, and technology. Program elements for corresponding or supporting reserve component units are also included in this category. These program elements contain resources specifically identified and measurable to these training programs.

Excluded are program elements for management headquarters, training conducted in operational units, training of organized crews and units, education and professional development of DoD civilian personnel, off-duty and voluntary education programs, and combat development activities. Also excluded are resource identification codes for students, trainees, cadets, and midshipmen. Also excluded are support activities consisting of base operations, real property maintenance, and base communications.

RB. Individual Training. This category contains program elements for provision of varied services in support of personnel, including recruiting and examining, the overseas dependents education program, Section 6 schools, reception centers, disciplinary barracks, centrally-funded welfare and morale programs, the American Forces Information Program, civilian career training and intern programs, and the program. This category also includes research and development program elements for human factors and personnel development research. Program elements for corresponding reserve component units are included in this category. These program elements contain resources specifically identified and measurable to these various programs.

Excluded are program elements for management headquarters resources. Also excluded are support activities consisting of base operations, real property maintenance, base communications, and training.

S. SUPPORT ACTIVITIES. The DPPCs in the this category consist of the base operating support functions for support installations (including all family housing and commissary resources) and centralized activities.

SA. Support Installations. This category contains program elements for the operation and maintenance of installations of the communications, intelligence forces, research and development, logistics, training, and administrative commands (Programs 3, 6, 7, 8, and

9), including supporting real property maintenance, base communications, and installation audiovisual support. Also included in this category are all family housing activities. These program elements include resources for installation headquarters administration; installation operational, housekeeping, and service functions; and commissaries. Program elements for corresponding or supporting reserve component units are included in this category.

Excluded are program elements for management headquarters and overseas dependent education.

SB. Centralized Support Activities. This category contains miscellaneous Service program elements that provide centralized support to multiple missions and functions that do not fit other DPPCs. Specifically included are headquarters program elements for combat developments, reserve readiness support, public affairs, personnel administration, audiovisual activities, claims, service-wide support, and other miscellaneous support. These program elements contain resources specifically identified and measurable to the specified activities.

Excluded are management headquarters and base operating support.

T. INDIVIDUALS. The DPPCs in this group account for military personnel who are not considered force structure manpower. They are transients, patients, prisoners, holdees, students, trainees, and cadets/midshipmen.

TA. Transients. This category contains only the Transient program element which consists of active duty military personnel in travel, leave, or temporary duty status (except for training) while on Permanent Change of Station orders.

TB. Patients, Prisoners, and Holdees. This category contains only the Personnel Holding Account program element that consists of active duty military personnel who are dropped from the assigned strength of an operational or training unit for reasons of medical, disciplinary, or pre-separation.

TC. Trainees and Students. This category contains active service officer students, active enlisted students, active enlisted trainees, active officer accession students, and the Reserve Components' training pipeline personnel.

TD. Cadets and Midshipmen. This category contains only Cadets/Midshipmen attending the Service Academies.

Z. MISCELLANEOUS. This group consists of three DPPCs: Retired Pay, International Support Funds, and.

ZA. Retired Pay. This category contains only the one program element for Retired Pay.

ZB. International Support Funds. This category contains program elements for Defense support of such international events as the Olympic Games and Pan American Games.

ZC. Undistributed. This category contains program elements for centralized accounts for such programs as Productivity Investment Funds, Foreign Currency Fluctuation Funds, and Force Structure Deviation which reflects the under or over manning of the force units (see the Defense Manpower Requirement Report for an explanation of accounting technique).

Service/Defense Activity Identifier

Positions 8 through 10 in the Program Element Code contain alpha character(s) that designate the service or defense activity. The alpha character identifier and service/defense activity title are listed below.

CODE	TITLE
